SAE ITC Program AESQ Strategy Group Holds Supplier Forum in Trollhättan, Sweden

WARRENDALE, Pa. (May XX, 2018) – Aerospace Engine Supplier Quality (AESQ) Strategy Group, an SAE ITC Program, held a Supplier Forum in Trollhättan, Sweden, April 11.

The event was hosted by GKN Aerospace and the keynote presentation was delivered by Emile Colongo, Head of Large Aircraft Propulsion for Airbus SAS. Colongo focused his remarks on Voice of the Customer within the aerospace industry.

Attendees to the forum learned the latest information on the SAE G-22 Committee's **AS13xxx** series of aerospace engine supplier quality standards. This series was developed to set common quality requirements for the global aerospace engine supply chain to operate more efficiently.

Those in attendance also were able to share their views and experiences with the current set of standards as well as provide feedback for inclusion in several new standards currently under development including problem solving, internal audit requirements, process control and supplier management.

The SAE ITC team specializes in establishing and managing consortia by providing proven processes, tools and resources. SAE ITC enables public, private, academic and government organizations to connect and collaborate in neutral, pre-competitive forums thus empowering the setting and implementation of strategic business improvements in global highly engineered industries. SAE International is a global association committed to being the ultimate knowledge source for the engineering profession. By uniting over 127,000 engineers and technical experts, we drive knowledge and expertise across a broad spectrum of industries. We act on two priorities: encouraging a lifetime of learning for mobility engineering professionals and setting the standards for industry engineering. We strive for a better world through the work of our philanthropic SAE Foundation, including programs like A World in Motion® and the Collegiate Design Series™.
